

The only program of fully interactive French education online

eLycée provides a high-quality, low-cost education solution for students of French language and culture. Our Internet-based courses, workshops and group sessions are engaging and contemporary and our program of classes are for Adults, Primary, Middle and High School students.

Fully interactive classroom

Our teaching method mixes 3 key components to create a successful learning environment for our students aged 10 and up:

- new evolving technology
- teacher-student interaction
- An online learning community

Although technology plays a vital role in what we do, the real value is in the way it is used to enhance traditional features such as classroom time and social interaction. Students spend quality time in the virtual classroom, working with fellow students and teachers using web-based collaborative tools like videoconferencing, shared applications and eLycée's unique virtual classroom, eMédiathèque.

Teaching Staff

Our eProfs (online teachers) are all certified by the French Ministry of Education (Ministère de l'éducation nationale).

Curricula

Our curricula are designed to engage and stimulate; we teach French language skills to a very high standard using contemporary material written by leading French cultural figures.

AP® French Language and Literature

Our AP® French courses are authorized by the College Board of education.

eLycée is endorsed by the Cultural Services of the French Embassy in the U.S.
