

The only program of fully interactive French education online

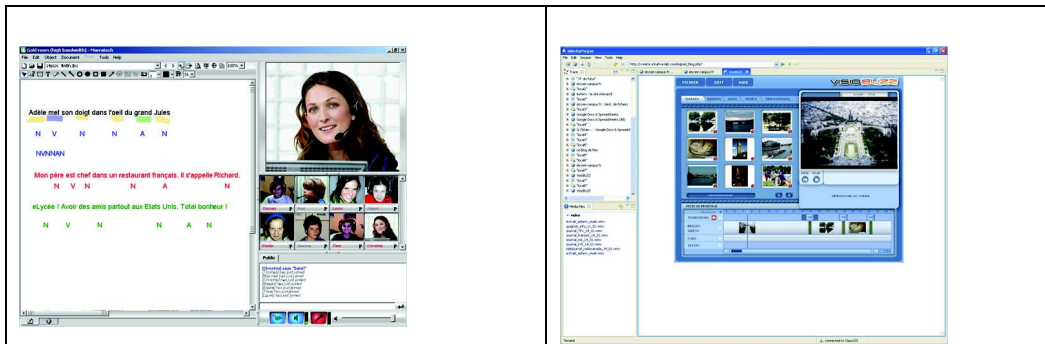

eLycée's total immersion courses for French speakers take place in virtual classrooms online. In the classroom, up to 12 students and their teacher see each other, speak with each other, and work together in real time using a range of shared applications. In groups, in pairs and in one-to-one sessions, students aged 10 and up learn through participation and activity. All our innovative courses make full use of new media and technology to help students practice and perfect their French language in a groundbreaking virtual classroom environment.

Why eLycée?

- 100% student retention
- 100% AP® French success*
- Certified, native French teachers (French Ministry of Education)
- Real interactive classroom
 - Full audio and video conference
 - Innovative new technology
- Original and compelling curricula
- Integrated new media and technology

*eLycée's AP French Language & Literature courses are authorized by the College Board of education.

eMédiathèque - virtual classroom environment

eMédiathèque was designed and developed by eLycée to enable students to work together in real time, as they would in a real classroom, with shared access to online tools and resources that are not available anywhere else.
